Abstract:

The statue that forms the subject of this paper is in the collection of the Egyptian Museum, (Cairo Museum JE. 36978(1)). This statue dates back to the Late Period and found by Georges Legrain in the Karnak Cachette(2). A full publication of the statue, and the scenes and inscriptions carved on its surface are included here.

At 40 cm in height, the statue depicts the block figure of Ns-ḥ3-nb-Dd\(^3\) the son of Ṣ3-ḥ3r-hnsw and is made of Granite. The statue is in a fair state of preservation, except for some shattering in its left elbow, represented Ns-ḥ3-nb-Dd in seated in a squatting position on a low square pillow and completely enveloped by a long cloak. This statue portrays the godfather of Amun in handsome form, completely enveloped by cloak, exposing his crossed-over hands in shallow raised relief on the top surface of the cube which is formed by his folded body. The forearm is carved with the name and the titles of the owner. His hands rest palm-down on the top surface of the cube, lacking wrists and the right hand is holding a folded cloth or papyrus while the other is bearing the \(\text{nh} \) sign. Seven horizontal rows of unframed inscription cover the front of the cloak with a vertical line presented on the toes. The back-pillar presented here is in wide form and engraved with two unframed columns descending to the figure of his son that is presented on it. Additional inscriptions of his sons are on each side of the body. All of the inscriptions although completely legible, are somewhat crudely executed.

The owner wears a broad, flat crowned, big wig presenting the well detailed ears exposed. Its rounded ends rest on top of the rectangular back pillar, and reach out to the extremities of the shoulders. The face is square-shaped, with a short section of beard attached to the chin, sinking into the surface of the cube. The smiling-mouth is thick-lipped and narrow. The almond-shaped eyes, long cosmetic lines emerging from their outer corners, have plastically rounded upper eyelids, surmounted by elegantly carved eyebrows in raised relief. The nose is broad and well carved flanked by the kushite fold at its nostrils.

(a) The earliest attestation of sṛk<sup>(4)</sup> is in Pyr.§1158, means “to inhale” and when compounded with htyt/ḥtyt<sup>(5)</sup> can be “to cause the throat to breathe”, “to open the throat” <sup>(6)</sup>. From the new kingdom onwards, it is attested as an epithet for many gods, such as Amun-Re, Bḥdty, and Osiris<sup>(7)</sup>. The title accompanies the priest Nṣ-b3-nb-dd after his death and takes his Osiris configuration. For other examples of this title during the Late Period, see R. El-Sayed, Documents relatifs à Saīs et ses divinités (BdE 69), 1975, p.12 (n).

(e) The name of ns-b3-nb-dd is written in the texts on this statue in two different forms one time as and the other as .
(f) The expression s3 mi nn, see John Gee, in: GM 202, pp.55-58.
(g) PN. I, 116.18
(h) The proper name $3tt-m3^t-\$rit-min$ is not cited in PN.

(i) $hwt - ntr ntyw ns dt$ is the most likely the correct reading for the question signs after $hwt-ntr$, the vertical wooden column is considered as an initial sign of the owner referring to his name.

**Back pillar: Fig. (3)**
The engraved back pillar bears two rows of text above which is a scene displaying an engraved figure of the godfather $Ns-b3-nb-dd$ son, facing right and wearing a long garment with unclear details as a sash kilt.

(d) The proper name $\text{nst-sn(t)}$ is not cited in $PN$.

**The right side: Fig. (4)**
The right side was engraved by the figure of his second son, facing left and wearing a sash kilt, framed by three lines of hieroglyphic inscriptions from three sides, reading as the following:

(a) It is not mentioned in $PN$.
(b) $PN$. I, 4.1.
(c) The exact reading of these signs is uncertain.

1. $s^3$ $f dsr-ntr-hr-R^c$ $m^\gamma$ $hrw$
2. $ir$ $n$ $nb(t)$ $pr$ $\text{nst wrt}$ $m^\gamma$ $hrw$

The Left Side: Fig. (5)

The scene here presents the engraved figure of the son, also wearing a sash kilt, rounded from three sides by unframed five incased lines of hieroglyphic inscriptions, reading:

1. $s3\ f \ ikr \ mr \ (f) \ nb \ m33 \ f$
2. $snrw-nbw-ß\ w^t(a) \ m3\ ḫ\ rw \ ir \ n \ 3st\ wr(t)$

3. your heart in the front, and not dying, may you unite, may you unite, may you unite, with Atun,
4. you give, and he make what he desire, your arm bear with
5. the offering that the king gives from everything good.

Fig. (5): Facsimiles of the left side, by the researcher
(a) It is not cited PN.

(b) $sk$ is the antonym of $\textit{nh}$ and refers to utter destruction and death, often parallel in use with $\textit{htm}$, see, P. Wilson, *OLA* 78, 1997, p.941.

Based on the inscriptions described above, the family genealogy of the statue owner is as follows:

\[
p^3 - h^3 r - bns (father) = 3 tt - m^3 r - srit - min (Mother)
\]

(Wife) $3 st - sn(t) = ns - b^3 - nb - dd = 3 st \ wr(t)$ (Wife)

Commentary

There are two basic types of block statues, both of which were created as early as the Middle Kingdom. One shows the subject entirely wrapped in the cloak; only the hands and the head protrude, while the feet are covered. The second type has the feet uncovered, and the arms are either modeled freely three-quarters in the round or are wrapped in the cloak\(^{(8)}\). Only the first of these two types is of interest here. It is by far the most typical form of the block statue in the Late Period, the head of the sculpture shown here looks alert, presumably a well-calculated effect, which could not fail to attract the visitor to the temple of Karnak, where, in the presence of his gods, the man represented wished to be remembered forever\(^{(9)}\). His name, as we learn from the inscriptions, was $Ns - b^3 - nb - dd$. He was a Theban priest and god father of Amun. This portrait of the Theban priest shows the classic figure of a striding man of powerful build and ideal

proportions in the best Egyptian tradition. The extremely hard material has been treated with great ease. Several philological peculiarities of the inscriptions point to the Late Period, especially for the suffix pronoun of the second person\(^{(10)}\), and the name of the father \(p\hat{3} - h\hat{3}r - h\hat{nsw}\) which occurs frequently in Late to Ptolemaic period\(^{(11)}\).

The wide wig of this man obviously points to early Saite date; its less flaring shape is characteristic for the sixth century. Thick plastic eyebrows and the nearly total absence of cosmetic lines at the corners of the narrow eyes occur often under Psamtik II and Apries\(^{(12)}\). On the other hand, the treatment of eyebrows and eyes is still found under Apries. The notches at the corners of the mouth, already noted earlier, are in this head particularly noticeable. These triangular depressions are among the many features of Egyptian modeling which were taken over directly by the Greek sculptors of the Archaic Period.
